

## Exercise 16:

### 1. SMTP Server Email Service

The screenshot shows a web interface for configuring an SMTP server. The main title is "SMTP". Below it are tabs: "Physical", "Config", "Services" (selected), "Desktop", "Programming", and "Attributes".

On the left is a "SERVICES" sidebar menu with the following items: HTTP, DHCP, DHCPv6, TFTP, DNS, SYSLOG, AAA, NTP, EMAIL (highlighted), FTP, IoT, VM Management, and Radius EAP.

The main content area is titled "EMAIL". It contains two service status sections:

- SMTP Service**: A toggle switch set to "ON".
- POP3 Service**: A toggle switch set to "ON".

Below these is a "Domain Name" field containing "debojyoti-mishra.com" and a "Set" button.

The "User Setup" section includes:

- Input fields for "User" and "Password".
- A list box containing the names "alice" and "bob".
- Buttons for adding (+) and removing (-) users.
- A "Change Password" button.

At the bottom left, there is a "Top" link with a small square icon next to it.

2. Email sent from Bob to Alice:
